## Skills

### Languages:

C++  
JavaScript  
Python  
HTML  
CSS

### Technologies:

React.js  
Node.js  
Express  
MongoDB  
Vue.js  
Numpy  
Git

### Courses:

Data Structures/Algorithms  
Computer Architecture  
Algorithms and Complexity  
Computer Networks  
Software Construction Lab

## Education

University of California Los Angeles	2017 - 2021
B.S. Computer Science	
Philosophy Minor	
Simi Valley High School	2013 - 2017
Valedictorian	

## Work Experience

Logos, Full Stack Engineer	June 2018 - Sept. 2018
Startup UCLA Summer Accelerator Program	
<ul style="list-style-type: none"><li>Developed the user interface for social media app that allows users to meaningfully debate about political issues and global news</li><li>Used HTML/CSS, JavaScript, Bootstrap, and jQuery to redesign and rebuild a responsive landing page for Logos</li><li>Built RESTful web application using Node.js, Express, Vue.js, and Firebase</li><li>Implemented certain functionalities in the web app such as geolocation, sanitization, and text input APIs</li></ul>	

## Activities

Startup Labs Accelerator Program, Tech Director	Jan. 2018 - Current
<ul style="list-style-type: none"><li>Teach startups how to create MVPs, form pitch decks, and navigate the startup process</li><li>Assemble and lead tech team to assist seed stage startups with website and application development</li><li>Create mentorship board by reaching out to successful entrepreneurs in the Los Angeles area</li><li>Utilize various social media platforms to lead outreach to the larger UCLA startup body</li></ul>	
Bruin Entrepreneurs, Software Developer	Oct. 2017 - Current
<ul style="list-style-type: none"><li>Lead the redesign for the Bruin Entrepreneurs website and different events pages</li><li>Implement certain functionality in websites, such as scroll and animation effects</li><li>Use different technologies, such as git, HTML/CSS, React.js, and Node.js</li><li>Help plan and manage various on-campus events, such as Startup Fair, for the student body</li></ul>	
Straight From the Heart Foundation, Founder	June 2016 - June 2017
<ul style="list-style-type: none"><li>Created this foundation to fundraise and donate money to UCLA Health</li><li>Built a website using Wordpress which allowed users to electronically donate money</li><li>Fundraised by selling items, such as candy and baked goods, to people within my local community</li><li>Brought awareness to heart maladies by successfully launching an awareness campaign at my school</li></ul>	

## Projects

Twitter App - Node.js
<ul style="list-style-type: none"><li>Utilized Twitter API to create web app that displays first twenty tweets of any public Twitter user</li><li>Used Node.js with Express to completely set up backend of application</li><li>Stylized the app using HTML/CSS in conjunction with Bootstrap</li></ul>
Sample Blog - Node.js
<ul style="list-style-type: none"><li>Developed a sample blog web app clone that retains most of a regular blog's functionality</li><li>Implemented routing by coupling Express and MongoDB to allow data population and retrieval</li><li>Created simple UI/UX by utilizing HTML/CSS and Bootstrap</li></ul>
NachenBlaster - C++
<ul style="list-style-type: none"><li>Developed a side scrolling arcade-style space shooter game using object oriented programming</li><li>Utilized polymorphism, recursion, and different data structures</li><li>Built functional enemies with a simple AI</li></ul>
